Market leaders in premium quality roofing systems

BMI Group was established following the coming together of **Braas Monier** and **Icopal Siplast**.

It is the largest manufacturer of flat and pitched roofing systems in Europe, with over 150 years of experience.

Our roofs cover all kinds of spaces – from where we live, work and learn, to where we rest, play or heal. Sharing Standard Industries' commitment to

BMI Group is part of Standard Industries, the world's largest roofing and waterproofing manufacturer.

A global business specialising in buildings materials for today's and tomorrow's needs.

anticipating future needs and unlocking possibilities, we take a truly unique perspective.

We don't see a roof for what it is, but for what it could become and how it can help inspire closer communities, build better businesses and enhance the lives of everyone.

Whether we are creating a hardwearing roof to resist the harshest extremes of weather, or one that actively works towards a more sustainable future, we are committed to providing peace of mind, progress and quality of life.

OUR ROOFING BRANDS

MONIER

Present in India since 1997, BMI Monier is synonymous with premium quality roof tile and roof system components. It is associated with all major builders and developers in India, with numerous successful and famous projects completed in many cities of India.

BMI Monier tiles come in various designs and colors in both concrete and clay. These are the most premium quality roof tiles available in the India today.

CoolRoof System

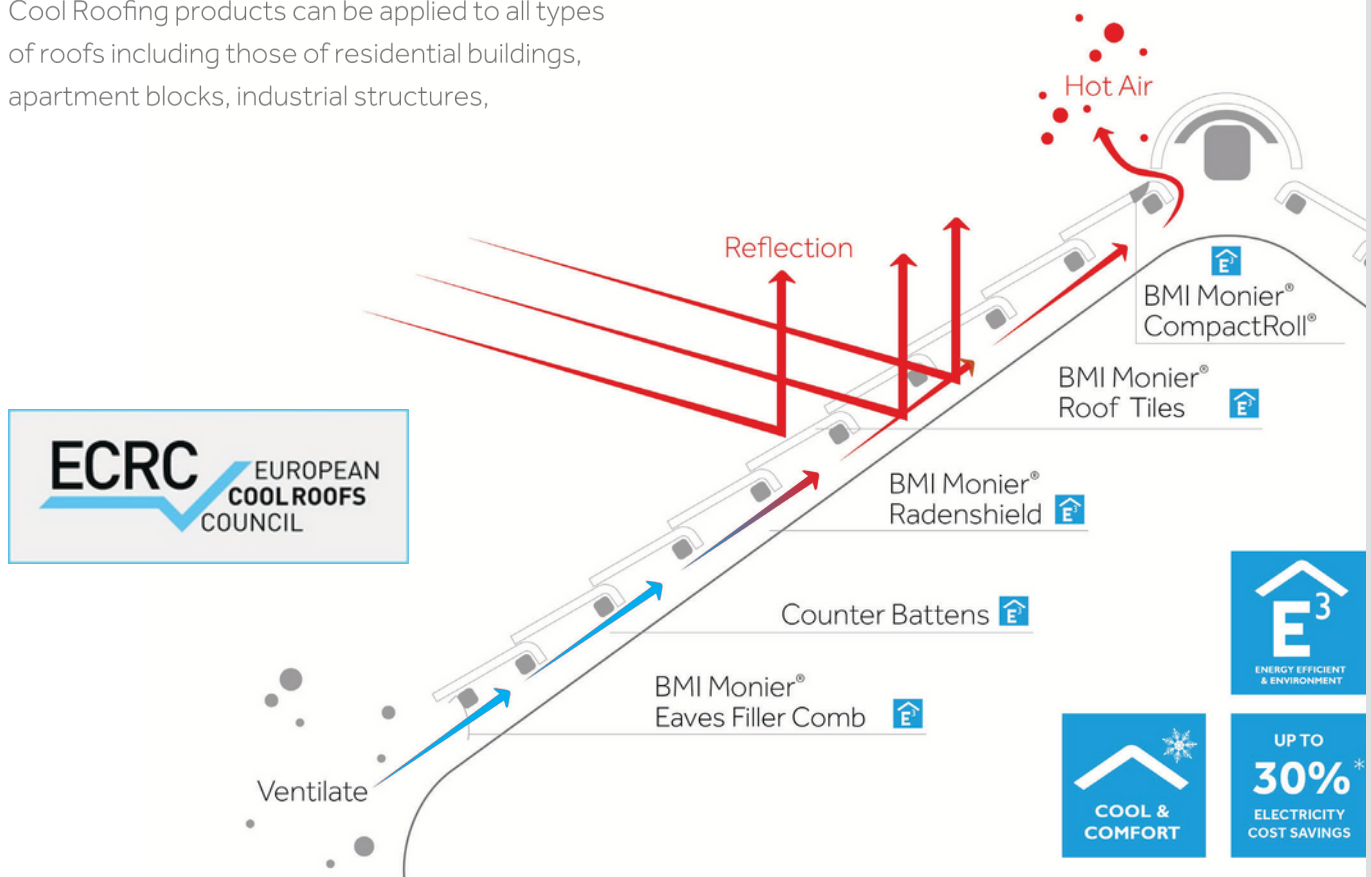

A Cool Roof system minimises solar heat gain keeping roof surfaces cooler under the sun. This is due to the materials used, which both reflect the solar radiation (solar reflectance) and release the absorbed heat (infrared emittance).

A Cool Roofing product is characterised by higher solar reflectance in comparison to conventional roof materials of the same colour and high infrared emittance values.

Cool Roofing products can be applied to all types of roofs including those of residential buildings, apartment blocks, industrial structures,

commercial buildings, hospitals, and offices.

BMI is member of ECRC (European Cool Roof Council, www.coolroofcouncil.eu) a non-profit association founded in 2011 to develop scientific knowledge and research in relation to a "cool roof" technology and to promote the use of cool roof products and materials in Europe.

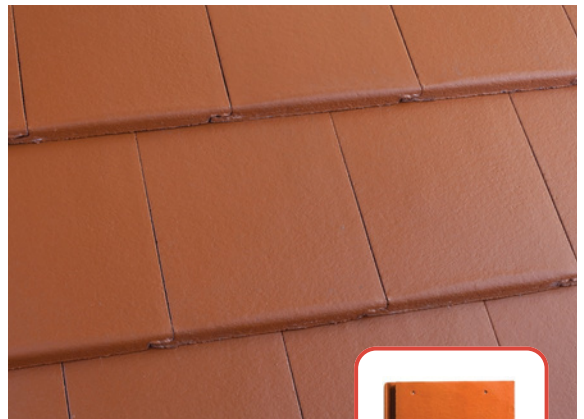

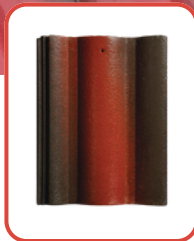

Mineral / Cement roof tile collection

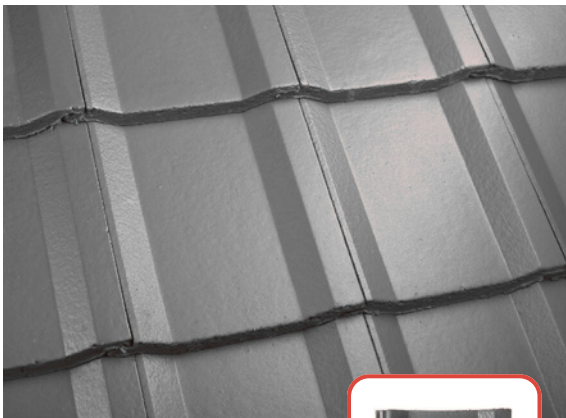

Cement is an indispensable building material for the construction of modern buildings and is highly versatile. Mineral / Cement roof tiles provide protection against wind and weather, and is an ecologically sound solution offering excellent value for money.
